EDUCATION

K.L.E INSTITUTE OF TECHNOLOGY, HUBBALLI

Bachelor of Engineering in [Electronics and communication] | CGPA: 7.52

KARNATAKA, IN

Nov 2022 – Jun 2026

EXPERIENCE

GLEAMATOR TECHNOLOGIES | Applied Artificial Intelligence

Feb 2026 – May 2026

- Engineered AI-powered data analytics solutions using **Python, SQL, Pandas, Power BI, and OCR**, transforming raw business data into actionable insights through end-to-end project development.
- Delivered two industry-focused projects, including an **E-Commerce Sales & Customer Behaviour Analytics System** and a live **OCR-based Data Extraction System**, improving data processing workflows and extraction accuracy through debugging and optimization.

PROJECTS

1. FOOD WASTE ANALYTICS FOR RESTAURANTS (Python, SQL, Machine Learning, Power BI, Streamlit)

- Developed an AI-powered analytics platform that predicts food demand, identifies waste patterns, and recommends inventory optimization to minimize food waste in restaurants.

2. PERSONAL FINANCE ANOMALY DETECTOR (Python, Machine Learning, MongoDB, Flask)

- Developed an AI-powered personal finance anomaly detector that automatically identifies unusual spending patterns, suspicious transactions, and abnormal financial behavior from user transaction data.
- Built machine learning models and interactive dashboards to detect anomalies, visualize spending trends, and provide personalized financial insights in real time.

3. CYBERSECURITY ATTACK TREND DASHBOARD (Python, MongoDB, Power BI, Machine Learning)

- Developed a cybersecurity analytics dashboard that monitors attack trends, identifies threat patterns, and visualizes security incidents to support proactive cyber risk analysis.

MAJOR PROJECTS

1. AI CLINICAL REPORT ASSISTANT (Vision + LLM + RAG)

- Built an AI-powered tool that uses computer vision to extract data from clinical reports and an LLM enhanced with RAG to generate accurate, context-aware summaries. Streamlined manual report review by automating information extraction and interpretation for healthcare use cases.

2. AI LEARNING COMPANION (AGENTIC AI STUDY COACH) (Python, LangGraph, LangChain, Llama 3, ChromaDB, FastAPI, MongoDB)

- Developed an AI-powered study companion that generates personalized study plans, explains concepts, creates quizzes, and answers questions from uploaded learning materials using Agentic AI and Retrieval-Augmented Generation (RAG).

SOFTWARE SKILLS

- Languages** : Python, HTML(basic), CSS(basic)
- Frameworks** : Flask
- DBMS package** : MySQL, MongoDB
- Office package** : MS Word, MS PowerPoint
- Operating System** : Windows, Linux
- DevOps Tools** : Docker, Git, CI/CD Pipelines
